Port Saint John Selects KleinPort

March 31, 2015

Klein Systems Group Ltd. is pleased to announce that it has entered into an agreement with Port Saint John, New Brunswick, to install the KleinPort Port Management Information System. The Port will be using KleinPort to manage and track its operational activities and cargo data, invoice for services and perform in depth data analysis and reporting.

Pete Behrendt, Managing Director of Klein Systems stated: “We are pleased to welcome Port Saint John to the Klein customer community and look forward to working with the Port to increase their efficiency.”

Jim Quinn, President and CEO of Port Saint John, said: “Port Saint John saw a clear need for a new Port Management Information System to address the needs of the Port and its stakeholders. Klein impressed us as having the combination of a comprehensive, proven solution, industry experience and track record of successful projects to most effectively meet our requirements.”

Port Saint John is Eastern Canada’s largest port by tonnage and has a diverse cargo base, including dry and liquid bulk, break bulk, containers, and cruise.

KleinPort is one of the most advanced port management systems available today. Klein Systems Group Ltd. (KSG), is a wholly owned subsidiary of the Saab Group, and a leading provider of Maritime Enterprise Software.
